

Mechanics jobs takes both being methodical and complex. There are steps to follow in order for a successful outcome of product. Talk to me about your learning style and if you'd feel successful.

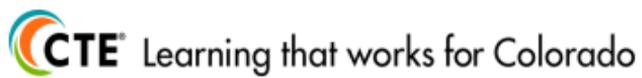

Automotive

Following manuals is important in skilled trades jobs. Would you prefer to assemble something following written instructions or watching a YouTube video?

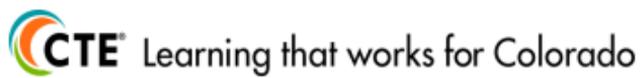

Automotive

**Would you rather
assemble a 500 piece or
1000 piece puzzle or no
puzzle at all and why?**

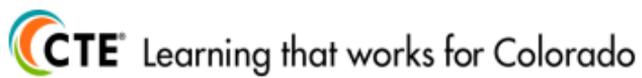

Automotive

**How do you see the rise
of electric vehicles
impacting the
automotive industry? -
Does that make it more
or less appealing of a
field to enter?**

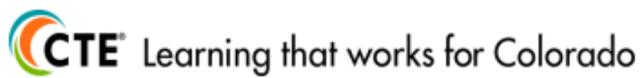

Automotive

Are you considering any certifications or advanced training after high school? If so, which ones?

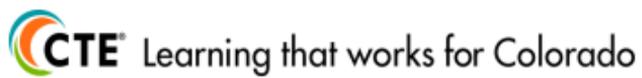

Automotive

Are there any particular types of vehicles or systems (electric, diesel, performance) that you are most interested in?

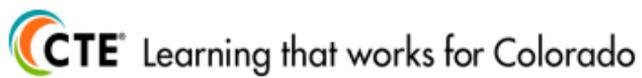

Automotive

**What motivated you to
study automotive
mechanics or collision?**

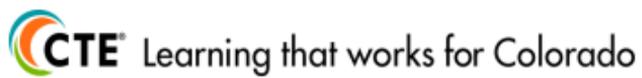

Automotive

**What specific skills do
you feel are your
strengths in automotive
work?**

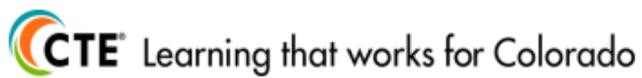

Automotive

**If your car failed to start
in a parking lot, what
would you do?**

Automotive

Sanding and painting vehicles requires the use of respirators. How does wearing a respirator for multiple hours of your day, make you feel?
